ABOUT SĂRULEȘTI LAKE - RADUTALAKE

Sărulești Lake (Răduță Lake) is famous worldwide for the World Carp Fishing World Cup, being declared the No. 1 in the world for this species in 2000, having both world records at that time: common carp (34.5 kg) and mirror carp (37.3 kg). Moreover, every year International Competitions and National Championships are held, both for carp and pikeperch.

In addition to the exceptional carp and pikeperch populations of Sărulești Lake, a massive sturgeon population has developed in recent years, making the lake an interesting book on 18 top destinations around the world for passionate fishermen and adventurous (in the " True Fishing Adventures " appendix, a book from DMAX by Olivier Portrat & Gregor Bradler).
